UNIT SERVICES

REGO – 1GN 4LX

Put together in 2021, this unit vehicle is 6 metres long (7.5 with the tailgate down), 2.8metres tall and 2.2 metres wide. It's roughly the same size as most industry vans so it doesn't require excess parking spaces making it the perfect vehicle for TVC's and drama with a crew under 80. It is designed and professionally racked for the onboard equipment, has a fluro light on the roof and is powered by a silenced Honda 6.5 kva

generator. It is a 3 tonne vehicle meaning it can be driven with a manual car licence. All of the equipment onboard is brand new as of March 2021. All electrical equipment is tested and tagged. The vehicle can power itself, caterer's and unit base with ease, or can be powered off mains electricity.

This unit vehicle is able to service up to 80 pax, so it is perfect for jobs both large and small.
