

**FILM SILENCED
GENERATOR**

65kVA

GENERATOR

After twenty five years of driving generators, plugging them up, checking oil and water, and washing them at the end of the job, it was time to get one of our own.

Introducing our **film silenced 65kVA trailer mounted generator** ideal for your production needs.

Our generator is a great work-horse for the industry and powering mid-size drama and television productions, small

commercials, and special event use. Towable behind any ute or truck with a three tonne towing capacity means it can be tucked away in the little spaces a truck or larger unit may not fit.

With 90 amps per phase it is great for running an M90, 10k Tungsten fresnel, a large array of LED fixtures, or the essential unit coffee machine as well as wardrobe and make up buses.

Featuring a Cummins motor it is designed to run all day. It's moderate size, excellent fuel usage, and reliability make it a great little unit.

SPECIFICATIONS

65kVA 3-Phase 50HZ

Max Output: 90amps per phase
RCD breakers fitted

OUTLETS:

- Powerlock Outlets
- 63Amp Three Phase
- 63Amp Single Phase
